**Favorite Places**

Waihe'e Ridge

- 1: Each trip the user creates is condensed into card. The user can scroll through the cards to pick the past trip they want to view.
- 2: After the user clicks on the trip they want to view the past trip view is brought up. This page is also scrollable. Under the main header photo, the first thing displayed is the friends that were included on this trip.
- 3: Under the list of friends is the map of the location they went. This will be integrated with Google Maps to show up based on the selected location for the trip.
- 4: When the user scrolls past the map, they can view their "favorite places" they marked in Google maps. These also show up as little cards that are scrollable left to right.
- 5: Under the favorite places is the Journal. This is just a preview of the Journal for this trip. The view can be scrolled or tapped on to pop into the full Journal view on a new screen.
- 6: Under the Journal is the gallery of photos from the trip. As this page is scrollable, the user can scroll down to view the rest of the photos.
